

Dear Sir/ Ma'am,

I would like to take this opportunity to invite you for the **free session of “Hands on Test Drive” on 3DVIA Composer – Technical Communication Software**. SolidWorks provides this software to help teams leverage existing 3D designs, communicate more clearly, work more efficiently and grow their competitive advantage.

Our expert will be explaining you the usage and exclusive features of 3DVIA Composer.

3DVIA Composer is a tool for repurposing 3D CAD Data to create both static and interactive content for technical communication, such as assembly instructions, product manuals, marketing collaterals and training material. Adding a new dimension to product communications, **3DVIA Composer Software helps product developers cut costs, save time and grow their competitive advantage.**

With 3DVIA Composer technology, manufacturing organizations can leverage existing 3D CAD Data to streamline development of technical communications and create more compelling documentation with higher impact. You can start your documentation sooner, update it faster, and complete it with the product design, giving you lower costs and decreased time to market.

**Tech Savvy Engineers** is the authorized reseller since 2002 for **Dassault Systems SolidWorks Corporation, U.S.A.** We have provided our services in almost all industry vertical such as Mechanical Machinery, Automotive, Electrical & Electronics, SPMs, Appliances, and FMCG etc.

We have more than **200 satisfied customers** and our team of certified professionals is available for **24 hrs customer support**. **Some of Our clients are:** Mahindra and Mahindra, **JBM Group, Motherson Group, Batla Engineering, Hind Hydraulics, Daikin, Flaktwood, Tata Elxsi, Whirlpool, Minda, SRS Diecasting and many more.**

Our experts will be glad to help you on your requirement and provide you with best solution.

As we have limited seats kindly, confirm your presence as early as possible.
